

HSI Product Datasheet

Product: IS-4008 Corner Slider

Description:

The IS-4008 Corner Slider is used to embed fiberglass tape onto inside corners in 90 degree ceiling and wall corner angles.

Application:

Embedding mesh tape for quick set and plaster based materials with an extendable handle able to be reduced or extended in length allowing it to be beneficial in tight closet or high ceiling applications.

Technology:

While corner embedment tools are available for paper tape used in drywall applications HSI is not aware of any pole mounted embedment tool designed to be used with fiberglass materials

Speed:

300% – 400% faster than embedding by hand or trowel

Options:

Other embedment heads available for drywall tape applications.

Ordering:

Corner Slider is provided in one version for easy ordering.
